

# SHELDON COLLEGE

Brisbane Automatic Gate Systems would like to introduce our recently constructed and installed projects, at one of Redland City's Premier Colleges.

These Two Sliding Gates are Fully Welded Aluminium, in a Classic Harbour Arched Design and finished off with a Satin Black Powder Coat. The design is taken from existing Gate Entrances along the Sheldon College Frontage to tie them all together.

The gates themselves create a Grand Entrance for the newly constructed Event Centre and its Carpark.

In addition the Gates are controlled by the 'Class Leading' SEA Saturn 800kg Rated Sliding Gate Operators. This system is Italian made, with an Oil Bath Gearbox, Internal Metal Gears & comes with Three Year Manufacturer's Warranty and is backed by our outstanding Team of Service Technician's, if required.

All in all we are very proud to have had the opportunity to work with Sheldon College & once again to help with the colleges ever growing needs.

- **Aesthetic Design.**
- **Control and functionality.**
- **Full management capabilities.**
- **Maximise revenue potentials.**

## Location:

Taylor Road  
SHELDON QLD 4157
